

Nov 11

EPOS TCS Near Fault Observatories (NFO) meeting in Slovenia, 11-12 November 2019

Monday, November 11, 2019 to Tuesday, November 12, 2019

Location:

Postojna, Slovenia

The EPOS Thematic Core Services NFO, Near Fault Observatories, will organise its meeting in Postojna, Slovenia at Karst Research Institute (ZRC SAZU) on November 11th and 12th, 2019.

This is a significant meeting for the NFO community because it occurs at the end of the EPOS-IP project and during

the signature period of the NFO Consortium Agreement from the Institutions managing its research infrastructures.

The meeting will be an opportunity to outline the work the [TCS](#) NFO did in the last 4 years and to discuss and decide the next stages to face together.

All the community components and Institutions are invited to attend the event.

During the meeting, a time slot will be dedicated for presenting new NFO (from Slovenia, Italia and Czech Republic) that would possibly enter in the community. Plus, there will be the opportunity to visit the local caves hosting scientific instruments, with the Slovenian colleagues.

Registration deadline the 31st of October 2019.

To attend the meeting contacts: dr. Stanka Šebela, dr. Magdalena Aljančič and dr. Lauro Chiaraluce.
